

SMART INTEROPERABILITY

Illuminate. Automate. Orchestrate

TAGNOS centralizes your existing data and provides workflow solutions to illuminate, automate, and orchestrate healthcare results within operating rooms, emergency departments, and asset management systems.

WORKFLOW SOLUTIONS

Asset Orchestration

TAGNOS Asset Orchestration solves the complexities of hospital asset and supply management by delivering additional care from each asset, eliminating supply waste, and optimizing asset maintenance. Experience a simplified asset management system designed to empower your clinical team, improve efficiencies and orchestrate the patient experience.

- Clinical Empowerment
- Eliminate Asset Loss & Waste
- Optimal Asset Maintenance

SOLUTION FUNCTIONALITY

Asset Management Automation

TAGNOS Asset Orchestration solves the complexities of hospital asset and supply management through providing clinician and staff visibility into asset locations and equipment status, preventing theft and loss, providing inventory updates for stock and sterilization management, reporting, and more.

Make equipment data accessible via desktop and mobile devices

ILLUMINATE

Asset & Supply Search & Locate

Searchable maps with the real-time location of any tagged assets and supplies. Automatically recorded location-based milestones.

Asset Theft/Loss Prevention Alerts

Alerts to notify clinical and non-clinical staff when assets and/or supplies are being moved outside of an authorized zone (facility, department, and more).

Search & Locate Analytics

Dashboards with insights into operational performance with summary and drill-down dashboards for asset- and supply-related KPIs.

AUTOMATE

Maintenance & Safety Work Orders

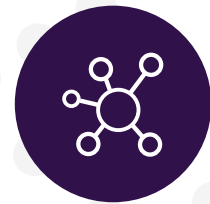

Dashboards to display and manage maintenance and work orders, including planned preventative maintenance, repairs, recalls, and more.

Inventory Management

Asset and supply inventory management dashboards to determine & manage par levels, manage rentals & prevent fees, and more.

Sterile Inventory Management

Specialized inventory management dashboards to coordinate the cleaning, preparation, processing, storage, and issuance of sterile supplies.

ORCHESTRATE

Inter Departmental Coordination

With Asset Orchestration, hospitals can integrate with other TAGNOS solutions such as OR Orchestration to facilitate inter-departmental process mapping.

Quality and Safety Compliance Reports

Using historical & ongoing data, TAGNOS can generate reports useful for ensuring and reporting end-to-end safety compliance.

Asset & Asset Type ROI Analytics

Advanced dashboards to compare asset utilization at point of care to asset costs to determine overall asset-level return on investment (ROI).
